DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE						
<p>Carthegena is a three bay long, one and one-half story brick structure with recently constructed hyphens and wings. (1960, designed by John Walton AIA) The principal portion of the house is laid in Flemish bond above an un-molded water table. Both facades are the same, there being a central entrance, which formerly had a transom, flanked by a single window on each side. On the "A" roof are three dormers and on the north gable rises a large brick chimney with bold cap. On the south gable there were originally two windows, one interrupting the belt course, and a corner chimney, but these features were lost before its 1960 alterations.</p> <p>The foundation below grade is built of stone. There is a partition dividing the cellar into two rooms. The arch support for the fireplace above is bricked up for an enclosed storage area. Two windows are located on the east side and one on the west.</p> <p>Since the paneling was removed in 1917 and installed at the Brooklyn Museum, the first floor has remained a single room, with a stair ascending in its original location, in the south west corner. No attempt has been made to reproduce moldings of the period of the house. Originally, the floor plan consisted of a large room which extended about two thirds the length of the house, with the stair hall located in the south west corner and a smaller room with corner fireplace opening into the stair hall. The room arrangement at the Museum is installed as it was in the house.</p> <p>The second story consists of a large bedroom and bath, but formerly was divided into three bedrooms and a corridor. Apparently, two of the bedrooms were formed like Sudlers Seclusion, Somerset County, one beneath each pitch of the roof. On the south side of the two rooms was a corridor, with the stair on the west and the third room on the east.</p> <p>The walls were composed of vertical feather edge paneling without molding, like the "old house on Church Creek" (D-37). A fielded panel was located above the four-panel doors. These walls have been incorporated into the closet walls and bath wall. The hinges have foliated ends commonly found in the early 18th century.</p> <p>A 19th century painting by A. P. Jones indicated the building had a two-bay brick wing with a hyphen and kitchen built of frame. These were apparently removed before the advent of photographs as none have been discovered which indicated the earlier appendages.</p>

STATEMENT OF SIGNIFICANCE

The house is important architecturally because it possessed an unusual floor plan and extraordinary paneling. It is comparable in age to Castle Haven, the brick portion of Jarvis Hill, and Yarmouth. Few buildings of this period appear to have survived into the 20th century, but across the Choptank there are three buildings of the approximate age, i.e. Lloyd's Landing, Boston Cliff, and Troth's Fortune.

Historically, the house is important as having been the residence of Henry Trippe and probably the product of his design. Henry Trippe was an important figure in the political realm in the second quarter of the 18th century.
